

PowerTerm[®] WebConnect RemoteView

Adding Value to Windows[®] Terminal Server

Everything you need in an application access

WHAT'S THE CHALLENGE?

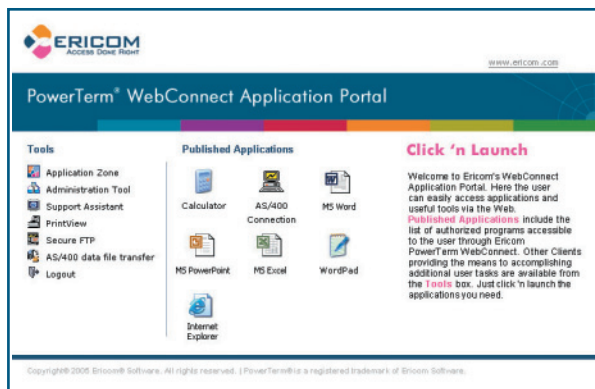

Organizations want to make sure that the staff – wherever they are, and whatever computing device they use – have easy 24/7 access to all the business applications they need.

ERICOM DELIVERS!

PowerTerm WebConnect RemoteView unleashes the power of Windows Terminal Servers. It enables enterprises to address user mobility, remote desktop support, application access needs, and more—while lowering TCO and increasing return on IT investments. Surpassing competing SBC offerings, Ericom's solution is easy to deploy, intuitive, and cost-effective.

KEEP THE ENTERPRISE IN SYNC – IN REAL TIME!

Ensure that your users seamlessly access the most current applications and updates without any of the delays associated with remote deployments and local desktop installations. Whenever applications are published, icons to these applications automatically populate and display on the user's Desktop, Start Menu, or Web interface.

Simplify application access via a Web interface

REDUCE THE COST OF MANAGING DESKTOPS

With PowerTerm WebConnect RemoteView, application management is moved from the desktop to a centralized sever. Deploy, activate and update applications via a centralized server—eliminating the need for costly client-based installations and technical support.

“Ericom's PowerTerm WebConnect could disrupt the balance of power in the Server-Based Computing arena.”

— Butler Group

PowerTerm WebConnect RemoteView provides secure, local and remote access to Windows Terminal Servers from Windows and Linux desktops, and thin clients. The combination of robust application access and enhanced Windows Terminal Server functionality optimizes IT resources, reduces desktop management costs and enhances enterprise productivity levels, with clear financial benefits.

- **Lower TCO** – Reduce IT complexity, optimize productivity levels and reduce licensing costs
- **Support Workforce Mobility** – Enable on-demand, secure access to corporate applications, data and services, from home or on the road
- **Increase User Flexibility** – Provide data and application access from Windows and Linux desktops, and thin clients
- **Expedite Application Roll-Outs** – Centralize application publishing and administration and save IT staff valuable time and travel costs
- **Reduce Terminal Server Licensing Costs** – Run more applications on fewer servers, lowering your overhead
- **Access Applications via a Web Browser** – Provide single-click access to enterprise-wide applications via a Web browser anytime, anywhere
- **Increase Enterprise Security** – Gain greater control over application access
- **Enhance Business Agility** – Ensure business continuity during server interruptions

CONNECT WITH CONFIDENCE!

Enterprise-level security includes support for SSL Gateway, Single Sign-on, Kerberos, and integrates with leading SSL VPNs. Encrypt connections from clients to Terminal Servers, even across public networks.

solution for a secure and agile enterprise

SUPPORT AND SATISFY USERS, ANYTIME, ANYWHERE

PowerTerm WebConnect RemoteView's built-in remote desktop support tool enables IT staff to take remote control of the user's desktop for immediate troubleshooting. The tool also enables instant messaging between the user and administrator, improving the user's experience and IT efficiencies.

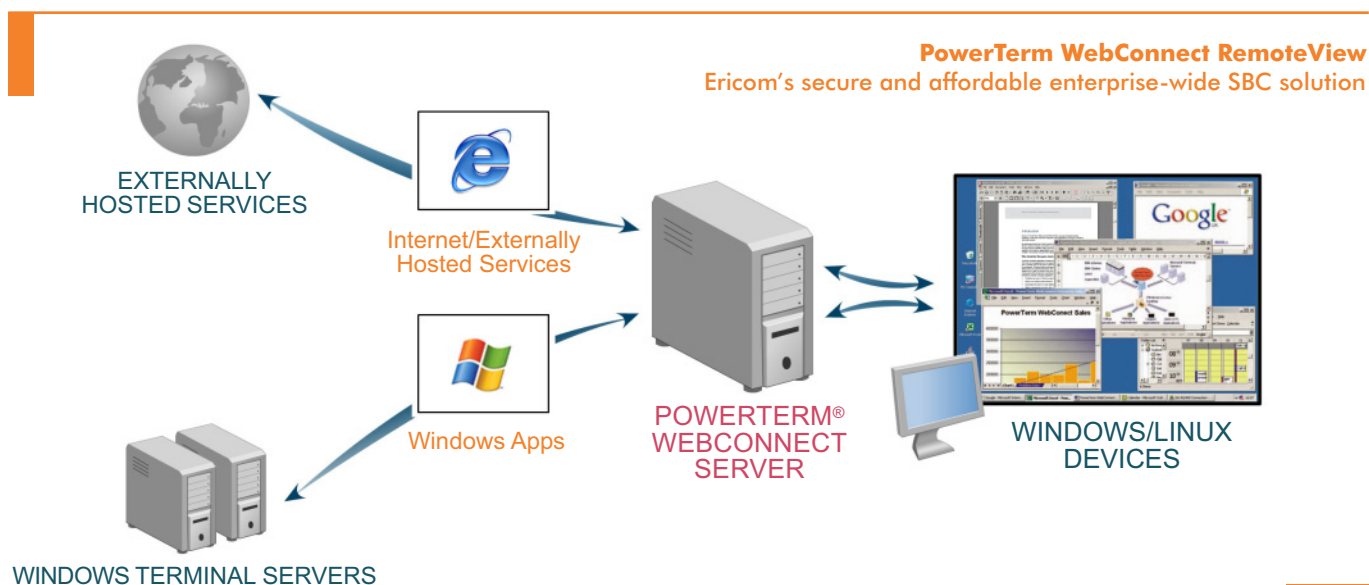

MAXIMIZE ENTERPRISE WORKFLOW

PowerTerm WebConnect RemoteView features highly scalable load balancing for Terminal Servers and applications. For each user session, PowerTerm WebConnect RemoteView allocates connections to the optimal server, preventing server downtime and improving workflow.

MAINTAIN BUSINESS CONTINUITY – EVEN WHEN DISASTER STRIKES

A three-day transportation strike and the staff can't get to work? Nothing is more important than being able to maintain business as usual. Empower your staff, regardless of their location, to continue working as if they were in the office. PowerTerm WebConnect RemoteView eliminates the need to install applications on remote PCs. Instead, it allows users to access applications running on a centralized server.

As an essential disaster recovery component, PowerTerm WebConnect RemoteView ensures business continuity by providing high availability to primary and backup application servers for uninterrupted application access. So no matter what – power outages or natural disasters – your users remain productive.

PROTECT INFORMATION PRIVACY

Lost or stolen laptops? Storing business-critical data and applications on secure servers, behind the firewall, eliminates such risks. Make PowerTerm WebConnect RemoteView an integral part of your security policy and business continuity solution to ensure the privacy of sensitive corporate and customer data – at all levels of the organization.

REGULATORY COMPLIANCE

PowerTerm WebConnect RemoteView enables enterprises to comply with major global industry standards (e.g., SOX, JSOX and HIPAA).

Simplify On-demand Application Access & Reduce IT Complexities

Secure, anytime, anywhere access to enterprise-wide data and applications from home, the customer's site, or on the road. Ericom's SBC solution eliminates the need to install applications on local and remote PCs, reducing IT complexities and enhancing IT efficiencies.

THE VALUE OF POWERTERM WEBCONNECT REMOTEVIEW

Backed by Ericom's global presence, technological expertise and excellence in support and professional services, PowerTerm WebConnect RemoteView's set of comprehensive Remote Desktop Protocol (RDP) enhancements delivers compelling advantages to the organization.

Making it Easy for the User. All the Applications You Need...None of Those You Don't

PowerTerm WebConnect RemoteView simplifies deployments and reduces license costs by publishing and delivering only those applications that the user requires. With Ericom's patent-pending True Seamless Windows, remote applications look and behave identically to local applications, thereby improving user productivity. Additional features include: enhanced Linux support; integration with JSR-168 portals, including IBM Workplace and WebSphere, and others.

Enhanced RDP Solution for Thin Clients

PowerTerm WebConnect RemoteView enables users to access their applications from thin clients, translating into significant savings for the organization. In addition to having a significantly longer life span than the average PC, all on-going maintenance and administration is performed at the server level, and there's no need to service or upgrade individual user devices. With its enhanced features, small footprint and industry standard security, PowerTerm WebConnect RemoteView is the product of choice for thin client application access.

Meeting Up with Real World IT Environments

SERVER PLATFORMS	Microsoft® Windows® 2000/2003/2003 x64; Linux for x86; and Linux for POWER
CLIENT PLATFORMS	Windows® 98; Windows ME; Windows NT; Windows 2000; Windows XP; Windows 2003; Windows CE; Linux
MICROSOFT® WINDOWS TERMINAL SERVER	2000; 2003; 2003 x64
SECURITY	SSL; SFTP; integrates with SSL VPN appliances
